

PERSONAL PROTECTIVE EQUIPMENT

PERSONAL PROTECTIVE EQUIPMENT- 1910.132

1. Personal protective equipment (PPE) must be provided, used, and maintained in a sanitary and reliable condition to protect workers from health and safety hazards.
2. Employers must ensure that employee-owned equipment is adequate and maintained in a sanitary and reliable condition.
3. All PPE must be designed and constructed safely to reduce the possibility of injury. Damaged equipment should never be used.
4. Employees must identify hazards (actual or potential) in the workplace.
5. Employers must select the proper PPE for those hazards and provide employees with the knowledge and training to properly wear PPE. Employees would be trained on:
 - When PPE is necessary
 - What PPE is necessary
 - How to use PPE
 - Limitations of PPE
 - Proper care, maintenance, useful life, and disposal of PPE
6. Employees must make sure that affected employees wear PPE.
7. There must be written certification – signed and dated – indicating that the hazard assessment has been performed.

PERSONAL PROTECTIVE EQUIPMENT

PPE CHECKLIST FOR EYE AND FACE PROTECTION

Job Activity:

This activity exposes the eye and face to these hazards:

- Impact Chemicals Dust Heat Radiation Glare

Describe the PPE used for protection from these hazards. *Include brand name, size, material type, and class/rating information:*

This PPE should be replaced by (date):

Describe signs that would indicate that this PPE is defective:

Describe maintenance and disposal requirements for this PPE:

PPE CHECKLIST FOR HEAD PROTECTION

Job Activity:

This activity exposes the head to these hazards:

- Impact Penetration Lateral Electric Other

Describe the PPE used for protection from these hazards. *Include brand name, size, material, type, and class/rating information (A-B-C):*

This headwear should be replaced by (date):

Describe signs that would indicate this headwear is defective:

Describe maintenance and disposal requirements for this PPE:

PERSONAL PROTECTIVE EQUIPMENT

PPE CHECKLIST FOR HAND PROTECTION

Job Activity:

This activity exposes the hands to these hazards:

- Cuts/Punctures Chemicals Abrasions Thermal Burns
 Electrical Unique (Grip, Vibration)

Describe the PPE used for protection from these hazards. *Include brand name, size, material type, and class/rating information.*

This PPE should be replaced by (date):

Describe signs that would indicate this PPE is defective:

Describe maintenance and disposal requirements for this PPE:

PPE CHECKLIST FOR FOOT PROTECTION

Job Activity:

This activity exposes the feet to these hazards:

- Impact/Compression Punctures Metatarsal Electrical Conductive/Static

Describe the PPE used for protection from these hazards. *Include brand name, size, material type, and class rating information.*

This PPE should be replaced by (date):

Describe signs that would indicate this PPE is defective:

Describe maintenance and disposal requirements for this PPE:
